Christmas Closing Hours

Closing at 5pm Friday 20th December 2024 and reopening 8.30am Monday 6th January 2025

Happy Holidays!

Wishing you a joyful holiday season

As the festive season approaches, we want to take a moment to express our gratitude to you, our valued customers.

Your trust and support mean the world to us, and we appreciate your loyalty.

This year, we've focused on continuing to bring you quality products and excellent service.

We look forward to working with you in the New Year.

It's confirmed HealthCare Essentials will be there with some of your favourite brands:

DIGITEST 3 PULP TESTER

ELEVATE YOUR DIAGNOSTIC SKILLS TO THE NEXT LEVEL

When percussion, ice, heat and radiographs are not enough, the Digitest 3 electronically stimulates the tooth to test for vitality. A quick and easy tool you may need for determining the cause of the patient's discomfort.

- Single tooth testing.
- Intuitive single button operation.
- Multiple test settings to accommodate your personal preference.
- Self-calibrating for quick easy setup.
- Ergonomic design.
- Four autoclavable probes (included) promote easy access to all tooth surfaces.
- Standard 9V battery enables simple in-office replacement.

SAFETRAY

DESIGNED BY DENTISTS FOR DENTISTS

SafeTray provides a new, clean work surface for every patient. A rigid reusable master dental tray supports a very thin recyclable plastic liner. Combined they provide an effective cross infection control barrier.

Comes in 3 tray options:

- A & C for general restorative procedures and supports up to 10 instruments in 2 configurations.
- B is designed to be used with larger instruments such as luxators and forceps.

MEDESY
ITALY

MEDESY

MEDESY have a huge range of quality dental equipment from Maniago, Italy. Their centuries-old art of steel processing meets the ability to keep up with innovation to support the commitment of professionals and ensure safety to their patients.

Their catalogue is so big, they are bound to have the piece of equipment you need!

DIRECTA

LUXATOR PERIOTOMES & ELEVATORS

Reasons to use Luxator Periotomes:

- Ergonomic design minimises fatigue.
- Fine tapered blade compresses the alveolar bone and cuts the periodontal ligaments leading to atraumatic extractions.
- High quality material gives the instruments outstanding tactility.
- Wide range of unique shapes and sizes enables users to find the ideal instrument for any extraction.

BEAUTIFIL II OPAQUER

UNIVERSAL BIOACTIVE NANO-HYBRID FLOWABLE OPAQUER

A "must-have" for masking discolourations, staining and metal colour. Can be used for pulp capping. Ideal flowability to achieve a uniform bubble-free thin layer. Like the rest of the Beautifil Composite family, this opaquer is bioactive to protect against secondary caries and minimise plaque formations. Comes in 2 colours, LO which is a lighter shade and UO which is more dentine coloured. 2.0gm syringe with 5 needle tips.

\$41

UO colour SH-1363

LO colour SH-1364

BEAUTIBOND XTREME SET

THE EXTREMELY EFFECTIVE UNIVERSAL ADHESIVE

Universal adhesive that bonds to all restorative substrates. Self-etch, selective-etch or total-etch technique, BeautiBond allows you the flexibility to bond restorations the way you want. Clinical applications:

- Direct Composite Restorations, Non-cariou defects, Diastema closure and Direct Veneers
- Intra-oral repair or direct/indirect restorations
- Cavity seal and Immediate Dentine Sealing (IDS)
- Immediate hypersensitivity relief
- Cementation of indirect restoration - veneers, crowns, bridges, inlays and onlays.

PULPDENT
DENTAL INNOVATION SINCE 1947

SNOOP

FOR CONSERVATIVE CAVITY PREPS

Snoop stains infected carious dentin in 10 seconds and helps preserve vital dentin that should not be removed. This is an important tool for conservative dentistry.

- Detects caries in difficult to see places
- Dark blue colour provides strong contrast with dentin and the pulp
- Propylene glycol formula is reported to be more accurate than water-based formulas
- Economical dropper bottle

∞ BIOCLEAR

BLACK TRIANGLE KIT

BIOCLEAR

The Black Triangle System, a matrix system that enables black triangle closure up to 40% faster* than with the original Bioclear matrices.

Black Triangle matrices are custom designed for black triangle treatment and require no trimming prior to seating. A colour-coded gauge and matrices make choosing the correct curvature for gingival embrasure closure simple and predictable.

Kit includes:

- Triangle gauge
- 10 of each size matrix
- 3 different sized contact saws
- Disclosing solution

SAVE 30% on PDT Micro Mini Gracey Curettes

PDT Micro Mini Graceys are area-specific curettes designed for perfect adaptation and control.

Inspired by PDT's Amazing Gracey series, the Micro Mini range boasts a compact design that's **20 per cent thinner** than its predecessor with **half the blade length** and an **extended terminal shank**.

Ideal for adaptation in extremely narrow pockets and furcations, each instrument is ergonomically designed to adapt to the tooth surface with no tissue distention or torque on the hand or wrist.

This nullifies the challenges faced when exploring deep periodontal pockets and eases subgingival insertion.

Proven to stay harder and sharper for longer, Micro Mini Gracey blades are crafted from robust 440A stainless steel. It's this unique design that allows them to last 2-7 times longer than other hand instruments on the market.

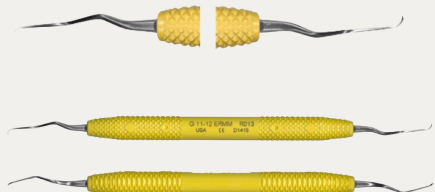

Each blade is set in a perfectly moulded, solid resin handle. This feather-light design features extended knurling for superior tactile sensitivity, while anatomically colour coding allows for easy setup.

TEPE PLAQSEARCH

TWO-TONE DISCLOSING TABLETS

TePe PlaqSearch™ is a two-tone disclosing tablet to visualize plaque, colouring new plaque red and old plaque blue. Using a disclosing tablet which colours the plaque is a quick and easy self-check method. The great advantage of TePe PlaqSearch™ is the two-tone effect which differentiates new and old plaque. Two different colour indicators: new plaque is coloured red, and plaque older than 12 hours is coloured blue.

- Quick and easy self-check method
- Two different colour indicators
- Teaching aid for better oral health

EMBRACE WETBOND

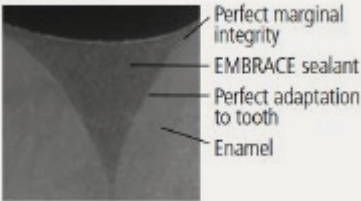

PIT AND FISSURE SEALANT

Embrace is the first pit and fissure sealant that bonds to the moist tooth. Research shows remarkable sealing ability to the tooth structure. It releases and recharges phosphate and fluoride, and it has longer lasting antibacterial activity compared to other leading brands, especially against S. mutans.

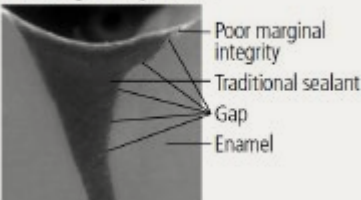

EMBRACE IS TOOTH INTEGRATING, CREATING A MARGIN FREE INTERFACE TO ELIMINATE MICROLEAKAGE.

EMBRACE

SEM shows Embrace Pit & Fissure Sealant without bonding agent. Note the smooth margin and the extraordinary adaptation of the sealant to the tooth.

Leading Competitor

SEM shows leading competitor's traditional pit and fissure sealant without bonding agent. Note the large gap between the sealant and the tooth.

Kane B, Karren J, Garcia-Godoy C, Garcia-Godoy E. Sealant adaptation and penetration into occlusal fissures. Am J Dent 2009;22(2):89-91.

GERMIPHENE®

E20

2-IN-1 WATERLINE AND SHOCK TREATMENT

- Easy daily waterline treatment to prevent bacteria and biofilm build up in your waterline without the harsh chemicals.
- Shock treatments are recommended monthly to clean out the waterlines. Simply use at the higher concentration and leave in the waterlines overnight then purge in the morning, just like you would every morning.
- Completely safe for patients, even at the higher shock treatment dose. Certified by NSF International as a safe drinking water additive.

BROWNES HELIX TST CONTROL TEST

1 HELIX + 250 STRIPS

Comes with the Helix and 250 test strips. It is a Hollow Load Process Challenge Device (PCD) and has been developed and validated for testing the air removal (steam penetration) capability of small Type B steam sterilizers.

A successful test confirms steam penetration through the helix and confirms by implication that air and other non-condensable gases have been removed.

Conforms to EN867-5 for use in performance testing for small sterilisers Type B and EN 554: 1994
